THE GRABBER™

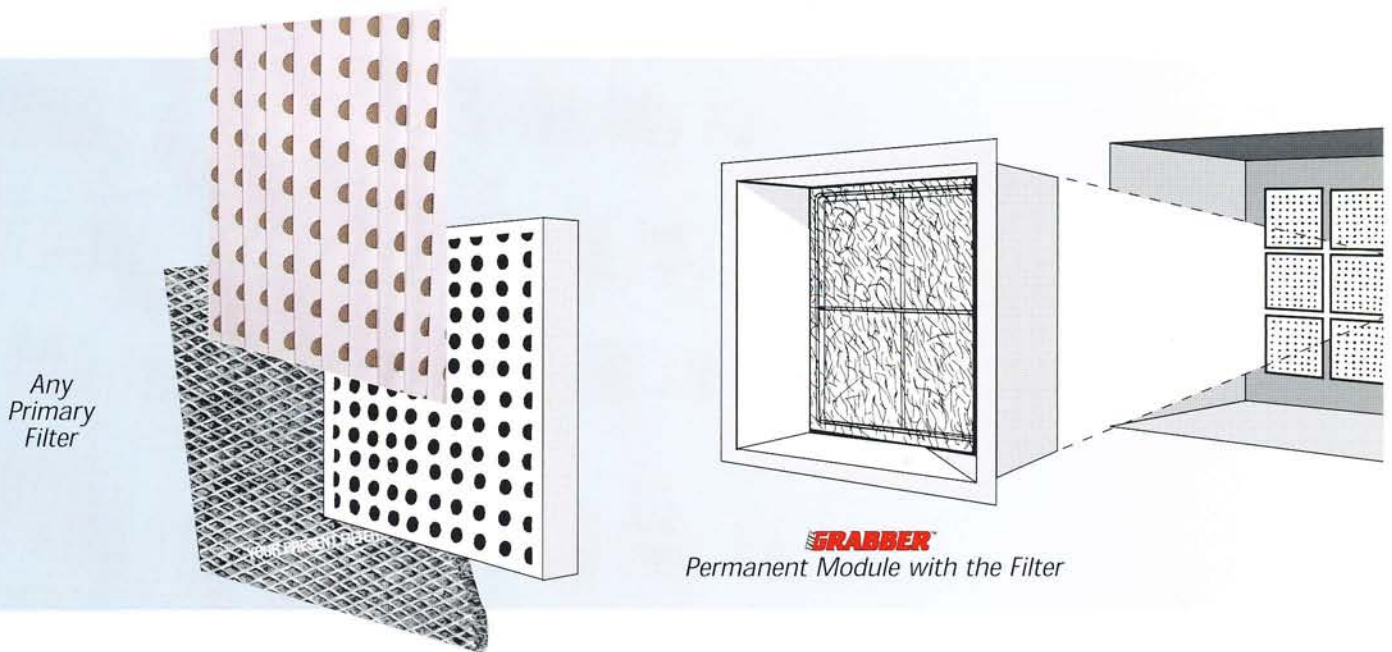

SPRAY BOOTH FILTER SYSTEM

Clean

GRABBER exceeds EPA standards of overspray emissions. Protects our environment!
Stacks stay clean too!

Simple

GRABBER is installed with a screwdriver in any spray booth – in minutes!
Self supporting filters are simply pushed into place – in seconds!

Efficient

GRABBER Filter System is self sealing allowing no overspray leakage around filter frames. Multiple stage filters assure prolonged filter life with maximum air flow.

The **GRABBER** converts a standard spray booth into a high efficiency spray booth. Your present filter acts as a primary filter – **GRABBER** (or permanent module) contains the final filter.

Standard Sizes:

GRABBER Permanent Module

GR-200 20" x 20" - Packed 1 per carton
GR-250 20" x 25" - Packed 1 per carton
GR-360 20" x 36" - Packed 1 per carton,
for accordion style
filter booth

GRABBER Filter

FM-200 20" x 20" - Packed 12 per carton
FM-250 20" x 25" - Packed 12 per carton
FM-360 20" x 36" - Packed 10 per carton

To Install:

1. Remove your present filter.
2. Push the **GRABBER** box into the opening.
3. Screw in place.
4. Replace your present spray booth filter.
